How to Use This Catalog

This catalog lists standard aluminum extrusion profiles offered by Affordable Aluminum for pricing and planning reference purposes only. Pricing, lead times, dimensions, and weights shown are indicative and subject to change. Lead times are estimates and not guaranteed. This catalog does not constitute a binding offer.

This catalog is updated once per month. Lead times and availability may change within the month. Please contact Affordable Aluminum for a formal quotation confirming exact quantities, pricing, and lead times.

Standard shapes not shown in this catalog may be available. Please contact Affordable Aluminum for availability. Additional standard shapes may be added on an ongoing basis.

Affordable Aluminum is not responsible for errors, omissions, or typographical mistakes in this catalog, including but not limited to weights per foot, pricing, or dimensional data.

Pricing

January 2026 is based on the following pricing structure:

	Volume (lbs)	MWTP* JANUARY	Conversion Rate***	Price per lb*
Solid Shapes	5,000	\$2.20	\$0.80	\$3.00
	2,500	\$2.20	\$0.90	\$3.10
	1,000	\$2.20	\$1.00	\$3.20
Hollow Shapes	5,000	\$2.20	\$0.83	\$3.03
	2,500	\$2.20	\$0.93	\$3.13
	1,000	\$2.20	\$1.03	\$3.23

*Volume Brackets

The cost of running smaller batches is higher than running larger volume batches. An extrusion line operates more efficiently when it can run continuously for multiple hours on the same shape, compared to short production runs. To accommodate customers who may not require larger volumes for certain shapes, Affordable Aluminum offers multiple order quantity brackets, each with its own associated conversion rate that reflects these differences in production efficiency.

**MWTP

MWTP stands for Midwest Transaction Price. It is a published pricing index for aluminum within the United States and is commonly used by billet suppliers to price aluminum feedstock for extrusion operations. The MWTP is set monthly based on the prior month's closing price. For example, if the December closing MWTP is \$2.20 per lb, that value becomes the MWTP used for all orders placed in January. The MWTP changes on a monthly basis.

***Conversion Rate

The conversion rate is the price charged by Affordable Aluminum to convert aluminum billets into the standard extrusion profiles specified by the customer. This rate includes transportation from the billet supplier to our facility, labor, dies, electricity, natural gas, and all other costs required to convert billet into finished extrusions and includes Affordable Aluminum's margin.

Commercial Notes

- All die and tooling expenses are incorporated into the conversion rate.
- January MWTP applies
- MWTP changes monthly
- All prices are subject to change
- All prices are based on 6063 alloy
- Add \$0.01 per lbs for 6005A alloy
- 6063 and 6005A are the only alloys available
- Pricing is based on FOB Affordable Aluminum facility, Houston, TX
- Pricing assumes standard bundle packaging
- Material will be loaded onto truck, trailer, or flatbed as applicable
- Net 30 payment terms are available only to customers with approved credit
- Shipping weight tolerance is minus 0 percent, plus 5 percent
- Actual shipped weight will be invoiced
- Extrusions are supplied to commercial tolerances unless otherwise specified and agreed in writing
- Shipping services are available and may be quoted upon request
- Machining services are available upon request
- Storage is available upon request
- Affordable Aluminum Terms of Sale apply
[Terms of Sale](#)
- Shapes shown in this catalog represent current standard offerings
- Affordable Aluminum is open to adding additional standard shapes to this catalog based on customer demand

Technical Notes

- Standard cut lengths are 20 ft or 24 ft
- Cut tolerance is $\pm 1/8"$
- Custom cut lengths are available upon request
- For structural applications, the client is responsible for determining whether 6005A is sufficient for the intended use
- Please refer to the 6005A white paper for alloy selection guidance
[6005A vs 6061 White Paper](#)
